Secure the poles with (4) M8 x 12mm set screws.

3

ASSEMBLE THE POLE ADAPTER TOGETHER

4

SLIDE THE POLE CLAMP ONTO THE POLES

5

SET THE VIEWING HEIGHT AND TIGHTEN THE SET SCREWS

Insert (4) M8 x 12mm set screws at the location shown, raise or lower the mount to desired height, and below then tighten using a M4 Hex key.

6

SELECTING THE MOUNTING HARDWARE

- 1) Insert a small straw or toothpick into the threaded inserts found on the back of the flat-panel.
- 2) Use a pencil to mark the depth of the threaded insert on the small straw or toothpick.
- 3) Mark the straw or toothpick 1/8" above the depth of the threaded insert, as shown in Figure 1.
- 4) Insert the small straw or toothpick into the remaining threaded inserts to compare and verify their depth using the straw or toothpick's 1/8" allowance mark.
- 5) Locate the correct diameter screw for the threaded insert.

If the screw you selected is longer than the 1/8" allowance mark on the small straw or toothpick, as shown in Figure 2 and Figure 3, do not use this screw. The screw length must not bypass the mark.

- 6) Test each size of the screws provided.
The correct screws should thread easily into the mounting point and not pull out when tension is applied.
